OVERVIEW AND OBJECTIVES

The International Conference on Innovations in Thermo-Fluid Engineering and Sciences [ICITFES - 2025] aims to bring academicians, scientists, and researchers together who are engaged in research and development of thermo-fluid systems and their applications in various fields of engineering and science. The conference will disseminate their research findings.

The conference theme will cover a broad range of topics related to thermo-fluid systems and their applications. It is anticipated that the conference will attract a wide range of disciplines. Plenary and keynote lectures, along with oral presentations of research papers, will be delivered in parallel sessions to foster interaction among participants.

PARTICIPANTS

Scientists, academicians, research scholars, and students from academic institutions, as well as researchers from research organizations and industries, can submit their research findings for presentations.
